CyberSafetyTraining.com

Making Compliance Fast + Easy + Painless

Cyber Safety Training

Cyber Safety Training offers training and certification on cyber safety for individuals and organizations. Cyber safety involves precautions and practices to protect against online threats like cyber attacks, identity theft, and online fraud. By practicing cyber safety, individuals can safely and securely navigate the digital world around them.

Cyber Safety Training

Every day in our modern world, technology advances in ways meant to benefit society, and every day, criminality advances at a matching pace.

For every app that a bank creates to make banking more convenient for its members, there is an individual or group working to gain unauthorized access to the personal information of the customers who use the app.

And for every user whose device is part of a larger network –– either at home or at work –– there is a cyber criminal who relishes the idea of gaining access to the kinds of private information stored on that user's device.
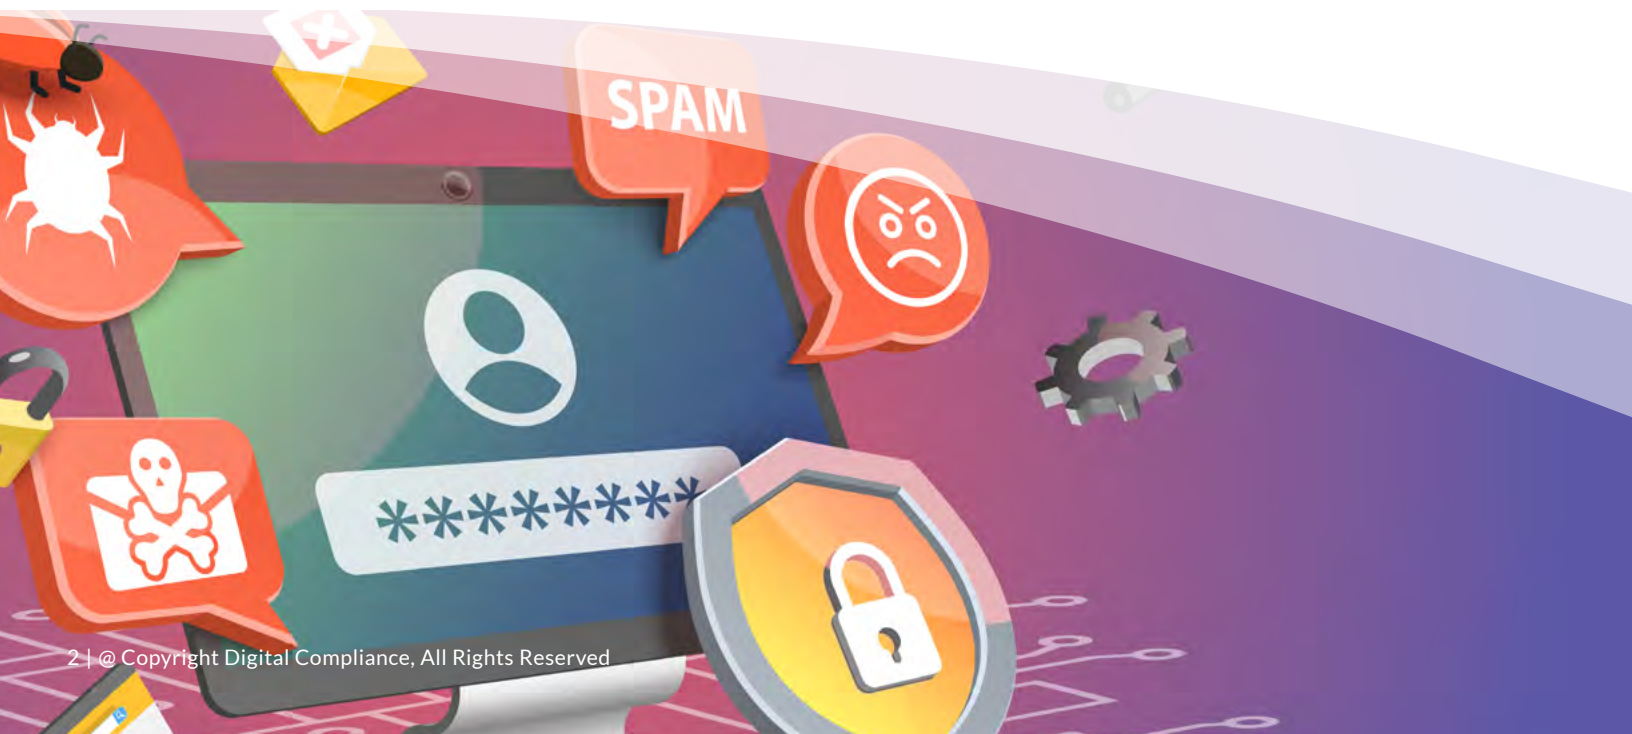

Cyber criminals or hackers have many reasons for doing what they do. Often, their motivations include:

- stealing money, trade secrets, information, or other items
- stopping a business or organization from operating
- holding data for ransom
- blackmailing

Cyber safety involves precautions and practices to protect against online threats like cyber attacks, identity theft, and online fraud. By practicing cyber safety, individuals and organizations can safely and securely navigate the digital world around them.

CyberSafetyTraining.com offers training and certification on cyber safety for individuals and organizations. In our course, we cover cyber safety best practices such as using strong passwords, updating software, utilizing anti-virus software and firewalls, being vigilant against scams, and safeguarding personal information.

Rollout Our Smart Training to Your Workforce in 5 Minutes or Less

How? Our training system is smart - *very smart* - and does almost everything for you. All you have to do is to email generic instructions to your staff. It is the same instructions for everyone and we've already pre-typed the instructions for you.

Have staff that doesn't have email? No problem, print off the instructions and give it to them as a piece of paper.

Once you provide the generic instructions to your staff you are done. The smart training system then takes over from there and trains, tests, generates certificates, emails you a copy of those certificates, and maintains a training log.

It can't get any easier.

☑ Our smart system utilizes a single shared multi-user login that eliminates the hassle of having to setup and manage multiple usernames and passwords.

☑ Everyone from your organization can log in from home or work (24x7) using the same shared login (no limit on simultaneous users).

☑ On passing the final exam, each individual is prompted to enter their name. The system then generates a PDF certificate for the individual and emails a copy of the certificate to the administrator for record keeping.

☑ The smart system maintains a detailed training log automatically for you.

☑ The Cyber Safety course is **1 hour** long, self-paced, and generates a **2 year** certification upon completion.

☑ Each employee receives their own certificate and wallet card immediately online upon successful completion of the training.

☑ There are no contracts or minimums. Our training works like a phone card so you can just purchase as you need. We provide a cumulative discount over the life of the account so it always gets cheaper over time.

Pricing Per Course	
Qty of Training Seats	Pricing Per Seat
1-9	$29.99
10-24	$24.99
25-49	$23.99
